

BADU[®] JET Active Version 2

Pure power from an adjustable nozzle challenges the swimmer to achieve maximum performance in his own pool. The BADUJET Active Version 2 is designed for upgrading existing units so it adapts perfectly to any swimming pool. The small, reliable yet extremely inexpensive overhang counter swim unit offers everything you could possibly need to relax. It has a bubble bath function as well as an optional massage hose to create an oasis of relaxation. The telescopic foot for above ground pools is also available as an option.

Here you will find our product video.

Details

Pool equipment: Counter swim units
Pump flow rate in m³/h: 20
Verwendung: Nachrüstung

Materials used

Blende/Haltegriff: Edelstahl
Innenteile: ABS / Edelstahl
Suction/pressure line: PVC/ABS

Field of application

This counter swim unit acts as an upgrade for all above ground and built-in pools. It is a conversation piece used for fitness training, as a wave or air bubble bath, for underwater massages (consult physician) and for endless, no-turn swimming - even in the smallest pool.

Design

The suction opening at the bottom of the BADUJET counter swim unit allows a powerful BADU pump to draw in the swimming pool water. The water flows back into the pool with a powerful jet via an adjustable nozzle.
